Cylinder

Compact Style Hydraulic Cylinder with Open Centre SS series	P. 55
Large Thru-Hole High Speed Hydraulic Cylinder with Open Centre S series	P. 56
Large Thru-Hole High Speed Hydraulic Cylinder with Open Centre S-L series	P. 57
High Speed Hydraulic Cylinder with Open Centre F series	P. 58
Coolant Collector Confirmation Device	P. 59
Double Piston Cylinder YW..R series	P. 60
Compact Style Hydraulic Cylinder with Closed Centre M series	P. 61
Hydraulic Cylinder with Closed Centre Y-R series	P. 62
Hydraulic Cylinder with Closed Centre Y-RE series	P. 63
High Speed Air Cylinder with Closed Centre AY-R series	P. 64
Stationary Cylinder YS series	P. 65

Manual Chuck

Scroll Chuck with Integrated Jaw(Straight Recess) SC·JN series	P. 67
Scroll Chuck with 2 piece Jaw (Straight Recess) JN..T series	P. 68
Scroll Chuck with Two Piece Jaw JN..RA series	P. 69
2-Jaw Scroll Chuck JT series	P. 70
4-Jaw Scroll Chuck JS series	P. 71
Independent Chuck (Straight Recess) IC series	P. 72
Independent Chuck (Short Taper) IA series	P. 73

Work Gripper

Work Gripper AS series	P. 75
----------------------------------	-------

Work Gripper (Multi-Plate)

AS M.C series	P. 76
2-Jaw Work Gripper AT series	P. 77
2-Jaw Work Gripper (Multi-Plate) AT M.C series	P. 78
Power Wing Work Gripper PWS06	P. 79
Internal Pull Lock Work Gripper PUES06	P. 80
Pull Lock Work Gripper PLS series	P. 81
Jig Module JM200	P. 82
Stationary Scroll Chuck SC-S series	P. 83
Option	P. 84

Jaws and Accessories

Soft Jaws for Power Chuck SB series	P. 87
Hard Jaws for Power Chuck HB series	P. 91
T-nut	P. 92
Hard Jaws for Scroll Chuck HBS series	P. 93
Soft Jaws for Scroll Chuck SBS series	P. 94
Back Plate	P. 95
Chuck Bung	P. 96
Chuck Grease CHUCK GREASE PRO	P. 97
Chuck Grease GREASE NIPPLE	P. 98
Stationary Gripping Meter JFT-S100	P. 99

DATA Compatibilities of Lathes to Short Taper Chucks	P.100
For mounting a directly-mounted type chuck to lathe spindle end	P.102
For order of Scroll parts	P.103

CHUCK

kitagawa

Universally recognised and trusted brand offering proven technology

For over half a century, KITAGAWA products have inspired confidence in customers all over the World. The Kitagawa series of chucks is wide-ranging and so technologically advanced that we can offer solutions for all machining conditions, no matter how punishing. Manufacturing systems with exceptional quality controls ensure the production of highly precise and superior products, which guarantee trouble-free operation. Our unique innovations in workholding solutions, supported by highly specialised design teams and a proven history of excellence, shows our capacity to challenge the world of engineering.

Standard Chuck

Cylinder series exclusive For KITAGAWA chucks

From our standard chucks and cylinders through to our most advanced, this extensive line up combines excellence with performance, and caters for all KITAGAWA chucking.

CHUCK

Large Thru-Hole High Speed Power Chuck B-200 series

World Renowned Standard chuck

* CE correspondence

CHUCK

Large Thru-Hole Power Chuck BB200 series

Stable machining even for large diameter bar material
Universally recognised standard chuck

● Standard Soft Jaw can be used for B-200 series as well

● Large through-hole

6 inch $\phi 53$ · 8 inch $\phi 66$

10 inch $\phi 81$ · 12 inch $\phi 106$

* CE correspondence

CHUCK

Large Thru-Hole High Speed Power Chuck BS300 series

Reduced Jaw Lift

The next generation chucking standard

- Compatible with B-200 series
- 30% drop in bending moment of Master-Jaw

30% Jaw lift reduction by side wedge design.
(Conventional Company Products : B-200 SERIES)

Existing Master-Jaw

Side Wedge designed Master-Jaw

$$F (L_1 + L_2) \gg F \times L \approx 1.3 : 1$$

CHUCK

Quick Jaw Replacement Chuck

QJR series

Suitable for small and large batch production Quick & smooth Jaw Replacement

Quick Jaw Replacement

2 types of easy replacement jaws, Serration and Tongue & Groove, are available as options. Jaw can be replaced quickly and easily by handle supplied.

Suitable for small and large batch production

Reduced set up time by Quick and Easy Jaw Replacement.

Interchangeable mounting dimensions

Kitagawa's B-200 and BB200 series can be easily replaced with QJR large thru-hole power chucks.

Dimensional Drawings

Gripping Characteristic Graphs

*Graphs show the relationship between the rotation speed and the gripping force at the position of aligning base jaws with chuck OD when using standard soft jaws.
*Centrifugal force is different largely depending on the size, shape or orientation of top jaws, or the position to insert base jaws.

CHUCK

Large Power Chuck for Vertical Lathes

NV series

Low maintenance Power Chuck for Vertical Lathes Sealed Base Jaw to prevent Swarf and Coolant ingress

- Protection against Swarf and Coolant
Protector and Scraper at Base Jaw prevent Swarf and Coolant ingress.

- Standard Jaw
NV series is compatible with standard Hard and Soft Jaws as sealing is at the Base Jaw.

CHUCK

4-Jaw Lever Type Power Operated Chuck with Closed Centre HW series

Steadily grips block, oval, or any irregular shaped works
Self Centring Mechanism (2+2 Jaws)

● Self Centring Mechanism

2 independent Jaw sets give Dual Action clamping allowing irregular shapes to be easily gripped. Consequently, it is the best to chuck a deformed work such as a square shape and elliptical shape.

● Long Stroke

Long Jaw Stroke ensures components with variation are gripped securely.

*CE correspondence

Standard Chuck

Gripping Example

Gripping Characteristic Graphs

*With standard blank soft top jaw.

※The work of diameter smaller than the above minimum gripping diameter can be gripped by using a collet pad (option).

AVF-3-FL type manual change valve (Special accessories)

This valve is light-weight, compact and can be operated with the press of a button. The simple piping can be routed when the selector is mounted on the lathe. The valve is the exhaust centre type and designed for exclusive UB types.

Pressure	0~1MPa (10.1kgf/cm ²)
Proof pressure	1.5MPa (15.3kgf/cm ²)
Push button operation force	4kg
Connection bore	RC ³ / ₈

CHUCK

3-Jaw Air-Operated Self Contained Chuck (Long Stroke)

UBR series

Dual Speed Jaw Stroke

Large chuck best suited for pipe processing

- Built-in Pneumatic Cylinder
- 2-stage stroke
Initially, jaws move quickly, slowing just before gripping thus reducing overall gripping time.
- Optimum for Jaw position confirmation
- Internal pressure can be detected

*CE correspondence

1. Unclamp position confirmation by proximity switch 1.
2. Clamp position confirmation by proximity switch 2.

Ordering length of air feed tube (option)

When ordering the air feed tube (coolant or non-coolant type), specify the spindle length LS as shown in the illustration. Air feed tube length LR is determined by LS. E.G. LR = LS + 17

In case of KPC43C048: LR = LS + 12
Chuck Adaptor and Retainer are options

Advanced Chuck

**Exclusively designed work
specific chucks for mass
production**

Designed with gripping to accommodate a variety of applications.

CHUCK

Dual Lock Chuck DL200 series

2-Way gripping

Unbelievable versatility with the ability to grip anything you want

● Increased gripping options

KITAGAWA introduce the worlds 1st chuck with two stage gripping action.

Parallel jaw clamping with secondary pull back action for work seating.

Jaws do not protrude in the Z Axis unlike conventional pull back chucks. This allows for improved gripping on difficult areas.

The gripping range is extended up the chuck OD allowing a wider range of workpieces to be machined.

DL series contributes to improve the productivity by applying flexible chucking for various operations.

● Ideal for volume production machining

Dust proof sealed body design for long life. Suitable for automation and volume production.

● Easy jaw forming

Serrated Jaws are used allowing for easy jaw forming by customer.

* CE correspondence

Gripping Example

■ Example

Possible gripping position
DL chuck
Conventional draw down chuck

■ Precautions for operation

1. Attach a work to a locator before gripping.
2. Do not use the chuck with a T-nut protruded from a master jaw end face.
3. When changing the method for gripping an inner diameter of the work from an outer diameter of the work, remove a cover in order to rotate the master jaw 180-degree.
4. A work pulling quantity varies by gripping conditions such as the gripping diameter of the work, stiffness of each jaw, jaw gripping height, etc. If the work will be deformed due to over-pulling of the work or vice versa, it is necessary to adjust parts or replace them. In this case, confer with our company.

5. To obtain a stable gripping and adequate pulling of the work, set jaws low.
6. For additional machining to the chuck end face, a pin hole level is acceptable. Take care so as not to pass through the cover.
7. For locator mounting tap of DL206, use a cover mounting tap.
8. When using optional jaws for DL206 and DL210, the additional machining of jaws may be required.
9. Optional jaw of DL210 is SB12A1 of 12-inch. Take care so as not to use a wrong type of the jaw.
10. Refer to the amounts below for Jaw Stroke (one side) from the gripping position to the unclamping position.
 DL206 : 0.7mm, DL208 : 0.8mm, DL210 : 1mm, DL212 : 1mm
11. Confer with our company about other unclear points.

CHUCK

Power Wing Chuck PW(C) series

※PWC has the same specification as PW with the exception of the fact that PWC is a compensation type.

Pull back of workpiece for secure gripping of casting or forging
PWC compensating type for rough casting through centre

●Powerful Gripping

After gripping the component in a radial direction, a power PULL-BACK action is applied which significantly increases the Gripping Force, allowing a heavier machine cut to be taken.

●High Durability

Master jaws are of spherical design and sealed against swarf and coolant. This permits High Gripping Forces to be retained between lubrication periods.

●Complete Sealing

Additional sealing at (1) and (2) reduces grease contamination and increases maintenance period.

●JAW Equalising

5°max equalising angle

Various workpieces can be firmly gripped by the self-equalising jaws to max. 5°.

●Gripping on Tapered Parts

The radial and PULL-BACK jaw action allows rough tapered castings and forgings to be securely gripped to maximum 20°.

■Type of the gripping pieces

*The type of the gripping pieces is selected according to the work conditions.

*CE correspondence

CHUCK

2-Jaw Power Wing Chuck PWT(C) series

※PWC has the same specification as PW with the exception of the fact that PWC is a compensation type.

Draw down irregular shaped materials for steady gripping
PWT(C) for gripping of square or flange castings or forgings

- Two jaw type for gripping irregular workpieces
Draw down action ensures secure gripping of workpiece onto a reference surface.
- Compatible with PW series and soft jaws
*CE correspondence

CHUCK

Pull Lock Chuck PU series

Pull back chuck for external gripping

- **High gripping stability means heavy cutting is possible**
Radial gripping forces and strong pull back action allow stable heavy cutting.
- **Excellent repeatability!**
Side and rear support provided by the base jaws reduces the centrifugal gripping force loss thus resulting in high repeatability.
- **Long-term stable accuracy!**
The sophisticated mechanism and special steel design ensure longevity and gripping accuracy.
- **Compatible with automation by use of seating confirmation**

CHUCK

6-Jaw Finger Chuck for Motorcycle Wheels

FG-M series

Finger Chuck ideally suited for aluminium wheel machining for motorcycles

● High Stability

The floating mechanism ensures firm chucking.

Gripping Examples

CHUCK

Easy Preparation Finger Chuck FG-Q series

Quick setup for size changes
Finger Chuck ideally suited for aluminium wheel machining for automobiles

- Easy preparation for each size of Wheel
- The setup time is approximately 30 seconds

Due to the preparation for each size, three levers and fixed jigs are moved simultaneously simply by rotating the handle, thus saving the setup time.

Stationary Cylinder YS series

Suitable for use on Machining Centre
Suitable for a variety of chuck types

- Best suited for versatile workpieces
- Can be easily mounted to milling and drilling machines
- Easily mounted to work gripper multiplate
- Pneumatic or hydraulic pressure can be supplied

Manual Chuck

CHUCK

Scroll Chuck with Integrated Jaw (Straight Recess) SC·JN series

Durable, reliable and versatile KITAGAWA'S standard type

- Straight Recess
- Single Piece Jaw Type
Available with hard jaw for internal and external gripping.
- Steel body
Body is manufactured from high quality steel to increase rigidity, durability and rotational speed.

(SC-3, 4, 5, 14, 16 are made of cast iron,
and JN-6, 7, 9, 10 and 12 are made of steel.)

SC-F Type

※SC type and JN type, each one set of internal jaws and external jaws are attached as standard. Soft jaws cannot be used for JN type. SC-F type, each one set of internal jaws, external jaws and soft jaws are attached as standard. ※When the soft jaws are used for SC-F type, use the chuck of lower specification.

※Since there are types mounted to the front side, please contact your agent if required.

CHUCK

Scroll Chuck with 2 piece Jaw (Straight Recess) JN..T series

Two piece jaw

- Straight Recess
- Cross guide (JN..T series)
Base jaw is located using cross guide reducing runout and distortion.
- Two Piece Jaw Type (with hard jaw and soft jaws)
Top jaw can be changed according to application (i.e. hard jaw suitable for heavy cutting, and soft jaw suitable for precisely machining. Each jaw can also be changed easily. Especially, the hard jaw can clamp inner diameter and outer diameter of work.
- Steel body
Body is manufactured from high quality steel to increase rigidity, durability and rotational speed.

CHUCK

2-Jaw Scroll Chuck

JT series

This two jaw chuck provides the optimum solution for gripping valves, pipe joints and other irregularly shaped components

● Straight recess

Mounting dimensions are the same as the JN type.

CHUCK

4-Jaw Scroll Chuck

JS series

Reliable and effective gripping of irregularly shaped components

- Thin walled materials ensure minimal distortion, even with thin-walled cylindrical pipe
- Straight recess
Mounting dimensions are the same as the JN type.

Work Gripper

**WORK
GRIPPER**

Work Gripper AS series

Pneumatically operated stationary chuck Can be used as an alternative to a fixture

- Small and lightweight design, with inbuilt air cylinder
- Easy mounting by air piping
- Hollow structure optimal for bar workpiece and air blow
- Standard Soft Jaw for Power Chuck is used
- Lock valve unit ensures constant and regular gripping force in all machining conditions

* CE correspondence

**WORK
GRIPPER**

Power Wing Work Gripper PWS06

Suitable for 3 to 5-Axis machines
Cost reduction achieved by built-in Cylinder

- Stationary clamping by pull back the workpiece
Suitable for rough machining, OP-10 or OP-20 with reduced setup time.
- Cost reduction achieved by built-in Cylinder * No need to introduce separated Cylinder for Chuck.
- Available on the standard column of machine * Total height is reduced by built-in Cylinder.
- Available to be mounted on NC Rotary Table

Pull Lock Work Gripper

PLS series

Pull Lock for steady gripping

Stable cutting is guaranteed through the high precision and exceptional gripping performance. Can be used as alternative to a fixture

- Stable cutting is performed by high precision and high gripping force
 - Perfect for CNC machining applications, thanks to component detection feature
 - Multiplate system also accommodates PLS Series gripper, allowing up to six grippers per station
 - It's compact design, featuring an inbuilt cylinder allows for more space in the machining envelope
- * CE correspondence

**WORK
GRIPPER**

Jig Module JM200

Securely grips a wide range of irregularly shaped components
New clamping system accommodates a variety of workpieces

- Option of lock valve mechanism meaning that during machining work can be held without air line
- Centralizing or compensating is switchable
- Face grip (end grip) is possible
- Seating can be checked automatically

One unit is equipped with three gripping functions.

Centralizing Grip **Centralizing**

External gripping by pull down

Center compensation grip **Compensating**

Compensating gripping using pin locators and pull down

End face grip **Face Grip**

Face gripping by pull down

Seating can be checked

■ Dimensional Drawings

Note : Grip metals for mounting main part can be optionally offered.

Jaws and Accessories

CHUCK

Soft Jaws for Power Chuck

SB series

Description of Model **SB06A1-80**

- Total jaw height. The height of standard jaw is not displayed.
- Number of jaws for 1 set - = 3 pcs. (for 3 jaws) T = 2 pcs. (for 2 jaws) Q = 4 pcs. (for 4 jaws)
- Serration pitch 1=1.5mm×60°, 2=3mm×60°
- Form and characteristic
 - A = Non cut of crest B = Cut of crest L = Light weight N = New type
 - C = Bolt spacing classification (In case spacing is different at same chuck dia.)
 - Hollow 4" = 15mm, hollow 5" = 18mm 12" chuck = 38mm 15" chuck = 43mm
 - D = for DL series
- Chuck sizes
- Power chuck soft jaw

Combination of Soft Jaws *Chuck models in parentheses are discontinued models.

**CHUCK**

Hard Jaws for Power Chuck

HB series

Description of Model HB06B1

- Serration pitch
1=1.5mm×60°, 2=3mm×60°, 3=1/16"×90°, 4=3/32"×90°
- Form and characteristic
A = 3-step jaw B = 2-step jaw
C = Bolt spacing classification (In case spacing is different at same chuck dia.)
U = for UVE N = New type
- Chuck sizes
- Power chuck hard jaw

Combination of Hard Jaws ※Chuck models in parentheses are discontinued models.

CHUCK

Chuck Grease CHUCK GREASE PRO

Chuck Gripping Force 1.5 times
(Compared to Standard Grease)

Service Life 3 times
(Compared to Standard Grease)

- Conforms to international standards for health, safety and the environment
- Loss of grip over time is reduced
Refer to graph below for B206 chuck.
- White grease is cleaner and reduces contamination
- Various sizes available; 18kg can, 1kg can, 400g bellows and 400g DIN cartridge

Chuck Grease Pro has been specially developed by Kitagawa by utilising long term experience in many applications.

The use of Chuck Grease Pro will extend life, increase gripping force and improve safety.

Fig.1 Gripping force check by grease

Fig.2 Grease Check Test

※The graphs show the grease performance, not the condition of using Chuck. Please refer to Chuck specification table for the condition of Chuck.

Using method

Grease the chuck with a commercial grease gun according to the instruction manual of the chuck as well as general grease.

Features

Color	Lemon yellow ~ yellow paste form	
Density g/cm ³	1.12	
Temperature range °F (°C)	18~300 (-28~149)	
Friction factor	0.06~0.1 (by LFW-1 Rotary Reciprocating Test Machine)	
NLGI Consistency	#2	
JIS K-2220 PS consistency	Mixing 60 times	265-295

CHUCK

Stationary Gripping Meter JFT-S100

Gripping force can be checked at a glance!

Compact design with excellent workability
Chuck gripping force is quantified, thus improving quality control and safety!

- **Compact and integral**
Integrated detector and display. Easy to handle with a low weight of only 1.3kg!
- **Zero adjustment NOT required**
Enables quick measurement with the automatic zero adjustment function!
- **Measured value memory function**
Stores three required measured values, and enables later checking.
- **Power-saving function**
Saves power with the automatic power-off function.
- **Battery voltage drop, excessive input, out-of-range zero adjustment, etc.**

The calibration certificate for ISO-9001 can be issued (option)

Dimensional Drawings

When the number of gripping points is 3.

When the number of gripping points is 2.

Specifications

Loading Cell	
Constant Capacity(per jaw)	100 kN
Allowable load	150 %
Gripped points	Two or three positions
Accuracy	±2 % R.O.
Measurable diameter	φ62~φ65mm (with Loading button A) φ62~φ75mm (with Loading button B)

Display	
Measuring range	0.5~100 kN
Max. Display	110.0 kN
Display unit	0.1 kN
Operation Switch	Sheet Switch Panel
Display unit	LCD Character display (8×2 line with Back light)

Others	
Power	Lithium Battery (CR123A) x2sets
Operation Temperature	0~50°C
Operation Humidity	80%RH or less
Weight	1.3 kg
Accessory	Loading button A (H 7mm) x3pieces Loading button B (H 12mm) x3pieces Battery for operation check (CR123A x2pieces)

CHUCK

For mounting a short taper chuck to lathe spindle end

●About lathe spindle end

Standards covering the lathe spindle end are stipulated in ISO, ASA, DIN, etc except JIS.

Japan major lathe manufacturers manufacture the great majority of lathe spindle end parts at standards of JIS-A1, A2 (ISO-A1, A2). However, a part of lathe spindle end parts is manufactured at ASA-A1, A2.

Although the spindle end dimensions according to each standard are the same, the dimensional tolerance of a face plate (chuck or back plate) varies by a few microns.

●Mounting the short taper (direct type) chuck for spindle end

The taper diameter of the short taper chuck for the spindle end is small slightly and the chuck has the some amount of interference (tolerance). A little gap occurs in mutual mounting end faces when the chuck is set. The chuck is closely touched by screwing mounting bolts. (The face having mounting bolt holes is the mounting face.) Tighten the chuck evenly by screwing bolts diagonally.

When interference (tolerance) of the chuck is large or small, any gap may occur in diameter direction. In the former case, the chuck may be deformed at the time of chuck mounting. In the latter case, a gripping accuracy becomes low for increasing a mounting error.

Similarly, the scroll chuck will also be deformed by tightening it excessively when mounting the chuck to the small end face of spindle end taper. Thus, the handle operation or chuck motion becomes heavy extremely.

Moreover, take care since the more interference, the more failure becomes large.

※See a lathe matching list of the short taper chuck.

When you need taper correction, since correction expense is required separately, please consult our company.

●For order of separate jaw scroll chucks JN..RA for short taper

When placing an order, establish contact with your agent or our company to advise a manufacturer name and type of a lathe used in a customer shop.

Since the dimensional tolerance of spindle end face may vary by manufacturers, it is necessary to correct the taper of the chuck rear body. (Please understand that there is a fluctuation of a delivery date and a price.)

Moreover, JN..RA types are standard and chuck mounting M bolts are packed together with the chuck. Since each chuck mounting bolt is manufactured at inch (UNIH1 bolt or wit screw) by manufacturers, confer with our company.

CHUCK

For order of Scroll chuck

● For order of hard jaws of scroll chuck [Internal, External & 2 piece jaw (Top and Base jaws)]

- SC series . . . Bodies of 3, 4, 5, 14 and 16 inches are made of cast iron.
- JN/JN-T JN..RA series . . . Bodies of 12 -16 inches are made of steel.

In SC series, Hard jaws are ground with the chuck and it is required the tolerance combination on the jaw fitting. As a general rule, Gripping face is ground concentrically in our shop as repair.

In JN series, the tolerance combination is not required but Gripping face is need to be ground concentrically.

In case of Base jaw for the 2 piece jaw chucks(JN-T/JN..RA), the tolerance combination is also required as well as SC type chucks.

At customer's strong demand, only parts will be supplied however, problem may occur, i.e. Accuracy is not satisfied because jaws are not ground with the existing chuck body.
